### Customer Care Package Features

**Buy Back Program** – The Dakota PC Buyback plan can help you upgrade affordably, easily, and responsibly. It will lock in your trade-in value today so you know what you'll get for your computer in the future. When you're ready to upgrade, bring your computer into any Dakota PC Warehouse store. If you return your computer on time and in good condition, you'll receive store credit for your buyback amount in the mail. We'll ensure your computer is reused or recycled to protect the environment.

**System Tune-Up** – To keep your computer running at its peak performance, the system tune-up will optimize startup and shutdown, install Windows updates, defragment the hard drive, remove temporary files, improve menu navigation, cleanup quick launch and taskbar, and create program shortcuts.

**System Cleaning** – Detail your PC and get it looking like new!

**Data Backup** – (Copied to external hardware) – To protect your computer data, this feature will backup your data to an external hard drive or to a new computer.

**System Thermal Optimization** – A smooth running computer depends on the proper heat removal. Thermal optimization will remove dust from inside the computer and verify operation of fans and cooling components.

**Anti-Virus Software** – Software to protect your computer against the latest viruses, spyware, and other threats. This software delivers fast, powerful online protection to keep you a step ahead of cyber attacks. It lets you chat, email and share files without worry. The software will update automatically and offers easy-to-use features.

**Anti-Virus Software Install** – Now that you have the software, let our trained technicians install the software for you. We will confirm computer compatibility for the install, configure the software, and perform any necessary software updates.

**Anti-Virus Cleanup** – If your computer get infected with a virus, we will troubleshoot your computer using virus and spyware removal tools. The cleanup tasks will remove viruses, spyware, malware and rootkits on the computer.
